SUMMARY

Software Engineer with experience in **backend development and Site Reliability Engineering practices**, specializing in observability, monitoring, and automation for distributed systems. **Strong focus on reliability, performance optimization, and reducing operational toil through automation.**

EXPERIENCE

Telstra - Associate Software Engineer

July 2025 – Present

• Site Reliability Engineering / Observability

Jan 2026 - Current

- Enabled **high-availability app scaling and platform optimization** on Kubernetes as a Platform Engineer in the B2B Digital Channels space.
- Led **observability** standardization across **1000+ applications**, implementing **OpenTelemetry-based** tracing, centralized logging, and metrics pipelines, improving incident detection time by **30–40%**.
- Automated the process of Observability Maturity Assessments across Telstra, **reducing manual efforts of approving and reminding for SRE Admins by 90 %** using Power Automate and Power Apps.

• Backend Engineering

July 2025 - Jan 2026

- Developed and maintained multiple **Java Spring Boot microservices**, delivering new features for a Telstra Enterprise client portal, improving system scalability and supporting high-volume client customizations.
- Reduced direct database dependencies by designing and implementing **dedicated read/write APIs**, improving system modularity, reducing tight coupling, and optimizing data access performance.

MathCo - Data Engineer Intern

January 2025 – July 2025

- Improved data reliability and **increased accuracy by 45%** by building data processing and prediction pipelines.
- Optimized referral alert processes for a global client, **saving \$250k annually and boosting operational efficiency** in healthcare analytics.

Altigreen Propulsion Labs - Data Intern

September 2023 – October 2023

- Enhanced predictive models' performance, **improving accuracy by 15%** using AutoGluon.
- Delivered insights from **million-row datasets with 80+ features** through analysis and visualization.

EDUCATION

Master of Science in Machine Learning & A.I.

December 2025 - Present

Liverpool John Moores University, CGPA - TBD

B.E. Computer Science and Engineering

June 2025

Nitte Meenakshi Institute of Technology, CGPA – 8.91

Bangalore, India

SKILLS

Site Reliability Engineering / Observability: OpenTelemetry, New Relic, Splunk, SLIs/SLOs, Distributed Tracing

Development: Java, Spring Boot, Microservices, REST APIs, React, Next.js, Python, PySpark, Scala

DevOps & Automation: Terraform, GitLab CI/CD, Docker, Kubernetes, Power Automate

Cloud Platforms: Google Cloud (GCP), AWS

Data & Systems: SQL, Databricks, Apache Airflow, Data Engineering Pipelines

ML/AI: MCP, TensorFlow, PyTorch, MLflow, Generative AI, RAG, LangChain, Agentic AI

PROJECTS

Customer Churn Prediction model for Waze app (Machine Learning) [Link](#)

Built a predictive model to identify potential user churn, **achieving a 92% accuracy rate** and delivering actionable insights to enable **targeted retention strategies**.

SmartLearnX (Gemini AI, RAG Pipelines, React, node.js) [Link](#)

Built a RAG-based AI learning platform using Gemini, LangChain, and vector search offering **personalized learning paths** based on user goals and performance, and generating customized educational content

ACHIEVEMENTS

- Completed official training and certifications from **Splunk** and **New Relic** in observability, monitoring, and alerting practices.
- **Google Advanced Data Analytics Professional Certification** (Google Career Certificates, Coursera)
- **Amazon ML Summer School 2024** mentee
- Recipient of the **Generation Google Scholarship for Women in Computer Science** (APAC) 2023
- Co-Lead, and Content & Documentation Lead, of **Google Developers Student Club, NMIT**
- **Established the NMIT Toastmasters Club** and served as the President for the term of 2024 July - December
